Colorado County Property-Data Platforms

A survey of the websites behind all 64 Colorado counties' Assessor, Treasurer and Clerk & Recorder offices, to decide which platform adapters OwnerLookup needs so that each county becomes configuration rather than code. Surveyed 14 October 2026. Nothing was built or changed in the project.

Summary

- **Tyler EagleWeb is the backbone.** It runs in **43 of 64 counties**: 36 Treasurers, 25 Assessors and 21 Clerk & Recorders, on Tyler's cloud (**.tylerhost.net*) or on the county's own server. One adapter with three apps (assessor, treasurer, recorder) covers more counties than every other platform combined.
- **Population sits in a few big counties with their own websites.** Ten counties run in-house Assessor sites (Denver, Jefferson, Adams, Arapahoe, Larimer, Boulder, Weld, Mesa, Summit, Teller), and El Paso an in-house Treasurer; these 11 counties hold 77% of Colorado's population. Each needs its own adapter (as Arapahoe already has), though the statewide parcel layer already gives owner and values for all of them.
- **Recorders are more concentrated than Assessors.** Seven recorder platforms (EagleWeb, Landmark Web, GovOS publicsearch, Harris Aumentum/Acclaim, Kofile CountyFusion, CIC, iDocMarket) cover 51 counties and 88% of the population; no county runs an in-house recorder site.
- **The statewide parcel layer covers 44 of 64 counties** (not 45 as the README says). Of the 20 missing, 11 can use their EagleWeb Assessor as the parcel source; 3 have no online assessor search and 3 were not determined.
- **Small counties use small Colorado vendors:** CIC (theCountyRecorder.com for 10 recorders, CTAS for 4 treasurers), GSA (7 assessors), Schneider qPublic/Beacon (7 assessors), iDocMarket (5 recorders), InfoEnvoy (4 assessors where nothing else exists).
- **Some data can't be reached by any adapter.** 7 recorders use iCounty, a Windows desktop (ClickOnce) application, not a website. Baca, Kiowa and Bent show no online assessor search (Dolores: a map only), and 5 treasurers only take payments.
- **Network access matters.** 18 county websites reset or block connections from the machine this survey ran on (it reports a non-US IP), and Schneider, Jefferson, Weld and Larimer sit behind Cloudflare-type challenges. Production lookups should run from a US host.

Platforms to build, in priority order

Ranked by counties and population covered and by how hard the site is to read. Already built: ArcGIS layers (parcels, value history, zoning, flood), GovOS publicsearch, Accela, eTRAKiT and Arapahoe's in-house sites. Population is the 2020 census, approximate.

#	Platform	Office	Counties	Pop.	Where	Notes
1	**Tyler EagleWeb**	assessor, treasurer, recorder	43	45%	Adams, Alamosa, Archuleta, Bent, Boulder, Broomfield, Clear Creek, Conejos, Costilla, Crowley, Delta, Douglas, Eagle, Elbert, Fremont, Garfield, Gilpin, Grand, Hinsdale, Jackson, Kit Carson, La Plata, Lake, Las Animas, Lincoln, Logan, Mesa, Mineral, Montezuma, Montrose, Morgan, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Grande, Routt, Saguache, San Miguel, Summit, Weld	Same JSP framework for all three apps: guest login, search by account, owner, address or reception, account page. Config: base URL per app (some use ports 8443-8447). Also the parcel source for 11 counties missing from the statewide layer.
2	**Landmark Web (Pioneer)**	recorder	6	24%	Adams, Chaffee, Douglas, Jackson, Larimer, Mesa	Covers Adams, Douglas, Larimer and Mesa: 24% of the population. Name/reception search.
3	**Spatialest**	assessor	4	19%	Douglas, El Paso, Gunnison, Huerfano	Single-page app with a JSON API. Record pages also exist for Denver, Grand, La Plata and Routt; check whether those counties are moving to it.

#	Platform	Office	Counties	Pop.	Where	Notes
4	**Harris Recording (Aumentum Recorder, Acclaim)**	recorder	3	14%	Eagle, El Paso, Grand	El Paso alone is 13% of the population. Acclaim also serves Grand and Eagle.
5	**Kofile CountyFusion**	recorder	2	13%	Denver, Kit Carson	Denver (12% of population); Kit Carson also on Catalis. Login (guest) required.
6	**GSA (gsacorp)**	assessor (Pueblo: also treasurer)	7	5%	Garfield, Logan, Otero, Pueblo, San Juan, Sedgwick, Washington	Same hosted search app per county (*<county>co-search.gsacorp.io*).
7	**In-house sites, one adapter each**	assessor, treasurer	10	65%	Denver, Jefferson, Adams, Larimer, Boulder, Weld, Mesa, El Paso, Summit, Teller	Like arapahoegov. High value for detail (sales, buildings, tax), but the statewide layer already gives these counties' owner and values. Several block scripted clients.
8	**CIC (theCountyRecorder.com, CTAS)**	recorder, treasurer	13	2%	Baca, Chaffee, Cheyenne, Custer, Dolores, Huerfano, Kiowa, Lincoln, San Juan, Sedgwick, Teller, Washington, Yuma	Colorado vendor for small counties; one site (theCountyRecorder.com) serves 12 counties.
9	**Schneider qPublic / Beacon**	assessor	7	2%	Chaffee, Conejos, Custer, Moffat, Park, Pitkin, Yuma	Behind a Cloudflare challenge: needs a browser engine or Schneider's data access.
10	**iDocMarket**	recorder	5	2%	Gunnison, La Plata, Las Animas, Rio Blanco, Yuma	Index search; document images need an account.
11	**InfoEnvoy**	assessor	4	1%	Archuleta, Rio Blanco, Routt, San Miguel	Assessor data mirror; the only online assessor data for Archuleta, Rio Blanco, San Miguel and Routt's alternative.

Coverage as platforms are added

Counties (and share of population) whose office can be read by a built adapter. In-house sites count only once their own adapter exists (last row).

Platforms built	Assessor	Treasurer	Recorder
Today (Arapahoe in-house + publicsearch)	1 (11%)	1 (11%)	4 (18%)
+ EagleWeb	26 (20%)	37 (51%)	25 (34%)
+ Spatialest, Landmark Web, GSA	37 (44%)	38 (53%)	31 (59%)
+ CIC, qPublic, iDocMarket, InfoEnvoy	48 (47%)	42 (54%)	46 (62%)
+ Harris recorders, CountyFusion	48 (47%)	42 (54%)	51 (88%)
+ in-house adapters for the big counties	57 (99%)	47 (96%)	51 (88%)

Still uncovered after all of the above. **Assessor:** Alamosa, Baca, Bent, Cheyenne, Costilla, Dolores, Kiowa (no online search, or not determined). **Treasurer:** 17 small counties, mostly payment-only portals or not determined. **Recorder:** Jefferson (vendor not determined), Park, Lake, Phillips, Mineral, Alamosa (not determined) and the 7 iCounty counties.

Parcel source: the statewide layer and its gap

Step 1 of a lookup (address or id to parcel) uses the statewide OIT parcel layer, which has 44 counties. For the other 20, the Assessor platform is the way in:

Assessor platform	Counties missing from the statewide layer
Tyler EagleWeb	Crowley, Delta, Fremont, Jackson, Kit Carson, Las Animas, Lincoln, Mineral, Montrose, Phillips, Prowers
not determined	Alamosa, Cheyenne, Costilla
none online	Baca, Bent, Kiowa
Schneider qPublic/Beacon	Chaffee, Conejos
GSA (gsacorp)	Otero

Bent and Costilla have an EagleWeb Treasurer, which can search by owner and address and so can serve as a fallback parcel source. Several of these counties also publish parcels on ArcGIS Online (Fremont and Las Animas, for example). Those maps weren't surveyed as data services and are worth checking.

Permits (county, unincorporated land)

Permits are issued by whoever governs the land: the county for unincorporated parcels, otherwise one of Colorado's 271 municipalities (not surveyed). County portals found:

Portal	Counties
Accela (ADAMSCO)	Adams
Accela (built)	Arapahoe
CityView	La Plata
Cloudpermit	Fremont
CommunityCore	Elbert
GovOutreach	Archuleta
In-house (apps.douglasco.gov/building)	Douglas
Laserfiche Forms	Garfield
MaintStar	Mesa
Schneider permitting	Yuma
SmartGov	Montezuma
SmartGov / MyGov	Huerfano
Tyler EnerGov	Eagle
Tyler EnerGov (likely)	Larimer
eTRAKiT / OpenGov	Summit
iWorQ	Conejos

No single vendor dominates. Accela and Tyler EnerGov are the commercial systems most likely to recur among cities, so they are the next permit platforms to build once cities are in scope. Public views rarely show permit contacts, so contractor names stay out of reach.

What no adapter can read

- **iCounty** (icounty.org) is a Windows desktop application for recorded documents in Archuleta, Bent, Conejos, Custer, Hinsdale, Moffat and Otero, also offered in Rio Grande and Saguache. It has no web search to automate.
- **No online assessor search:** Baca, Kiowa and Bent (information pages only), Dolores (an ArcGIS map only). Cheyenne and Alamosa weren't determined.
- **Payment-only treasurers:** Baca, Kiowa, Huerfano, San Juan and Sedgwick link only to a payment processor (Point & Pay, Forte, Velocity), which shows no tax data without a bill number.
- **Historical recorder archives** (ARCA, gov.arcasearch.com) for Las Animas, Otero, Sedgwick, Washington and Yuma hold older images only.

Method and limits

- Start: each county's official website (State Auditor's County Assessors list; Colorado County Clerks Association directory for current Clerk & Recorder pages).
- Crawl: each county's home and Clerk & Recorder pages plus the Assessor, Treasurer, GIS and permit pages they link to; every outbound link was matched against vendor URL fingerprints.
- Probes: vendor naming patterns checked for all 64 counties: Tyler cloud hosts (<county>countyco-<office>.tylerhost.net), GSA, Spatialest, InfoEnvoy, publicsearch. Common county subdomains (assessor., treasurer., eagleweb., egov., recording.) were looked up and their pages fetched. Vendor county lists (theCountyRecorder.com) were read.
- Gaps: web search and a fetch tool on a different network for counties that block this machine.
- **Confidence.** Most entries were confirmed by reaching the page or by the county's own link. Entries marked *likely* rest on a vendor hostname or a third-party guide. *Not determined* means the site blocked access and no reliable source was found. Counties change vendors (several show both an old and a new system), so verify before building each county's config.

All 64 counties

Platform per office. *(likely)* = hostname or third-party evidence only. Statewide = in the OIT statewide parcel layer. Population in thousands (2020, approximate). Evidence URLs are in the appendix.

County	Pop. (k)	Statewide	Assessor	Treasurer	Clerk & Recorder	Permits (county)	Notes
